

FastPac™ DI⁸⁷⁵ Inserting System

FastPac™ DI⁸⁷⁵ Inserting System

Compact, Fast and Affordable Handles up to 3600 C4 or C5 mail pieces per hour

The FastPac™ DI⁸⁷⁵ Inserter is the latest addition to the well proven range of Mail Creation products from Pitney Bowes. It is the most compact and easy to use flats inserter available on the market with unique features such as A4 flats inserting capacity of 12mm, at speeds of up to 3600 inserts per hour.

On-line with either the document feeder or the multi feeder, it gives you the option to feed and collate up to six individual flat documents into wallet or pocket envelopes automatically. Hand fed, it can take up to 12mm packages of 80gsm from laser printers or copiers and can also handle combinations of catalogues, magazines, booklets, reply cards/envelopes and flat or pre-folded documents.

The unique combination of features and capacity, previously found only in large and expensive systems, are found within this compact, operator friendly and cost-effective unit, making it the ideal inserter for most mailing needs in direct mail companies, distribution centres, in-house mailing operations, quick printers and copy shops.

DISPLAY

Extremely easy to set up for different jobs thanks to a fully microprocessor controlled operation. Just four buttons to do the settings. Step-by-step guidance for the operator through the menu driven LCD display.

DOCUMENT FEEDER

Automatically collates up to six A4 or A5 flat documents for insertion. Misfeed and double-feed detectors ensure that collations contain the correct number of documents.

MULTI FEEDER

Combined with the document feeder, this offers a fully automatic system for inserting a collated set of sheets plus a booklet or document up to 8mm thick from the multi feeder.

STACKER

The envelopes are counted and stacked on the receiving tray, ready to be franked and posted. A warning sensor notifies the operator when the envelope stacker needs to be emptied.

ENVELOPE FEEDER

The envelope feeder can accommodate as much as 100mm of envelopes for A4 to A5 sized documents. Top load and bottom feed allows the Fastpac™ Inserter to run continuously without stopping for reloading.

DOCUMENT TABLE

The inserts are fed to the document table from either the document feeder, multi feeder or manually. When manually fed, speed is automatically adjusted to the operator.
